Dear Sir/Madam

**FWC Forms - General protections forms published for consultation**

Thank you for the opportunity to provide feedback on the general protections forms published for consultation. Having read the case and reviewed the forms, it appears that the separation into two forms will help to simplify the matters and avoid confusion or ill completed forms.

The forms appear to cover all the relevant items. We would expect that there will be attachments to the form, given there is little room to complete detail where required.
