Our ref: [LP:GA]

Dr James Popple  
Chief Executive Officer  
Law Council of Australia  
Level 1, MODE3  
24 Lonsdale Street  
BRADDON ACT 2612

By email: [REDACTED]

Dear Dr Popple

### **Resources and initiatives relating to cybersecurity and the legal profession**

Thank you for the opportunity to provide input on cybersecurity-related resources and information for legal practitioners

We have compiled a summary of QLS resources and initiatives below.

#### **Overview of QLS efforts to address cyber assisted fraud**

QLS has a number of resources and tools available to assist members to improve their information security defences.

These operates in conjunction with the Cyber Essentials insurance package which provides access to expert assistance in response to cyber incidents.

Resources are available on an open, on request or for purchase basis.

The central theme of the methodology and resources is based on two fundamental principles:

- security is a cultural and risk management challenge, rather than primarily a technical one. Reasonable security depends on interlocking shields of people, process and technology; and
- security is not one-size-fits-all. This is particularly so for the Queensland legal profession which consists of a large proportion of sole practitioners and small practices and is geographically dispersed. Accordingly, a reasonable minimum for one firm or practitioner may be unattainable for another. Further, guidance as to technological solutions or tools should not be prescriptive to ensure there is sufficient flexibility depending on practice size and resources, individual risk analysis and evolving technology solutions.

## Resources and initiatives relating to cybersecurity and the legal profession

QLS has, for several years, worked to prepare structured materials to assist its members to assess the risk they face, prioritize where resources should be deployed and then implement a series of projects to address the most common information security deficits.

Materials are provided for basic risk assessment and mitigation on the QLS website, and detailed mitigation strategies are available upon request with options, depending on firm size.

The QLS Ethics and Practice Centre has summarised a list of relevant resources ((Annexure A (**On demand and published resources**) and B (**Unpublished resources available on request**)) for your information.

### Cyber security course

QLS is currently in the process of exploring an opportunity to deliver a basic cyber security course which will facilitate subsequent certificate upon completion.

Lastly, Lexon Insurance, our Professional Indemnity Insurer, also provides education and cyber risk management checklists which are available to QLS members.

If you have any queries regarding the contents of this letter, please do not hesitate to contact our Legal Policy team via [policy@qls.com.au](mailto:policy@qls.com.au) or by phone on (07) 3842 5930.

Yours faithfully

Genevieve Dee  
**President**

## Annexure A – QLS Cyber Resources

### Cyber Prevention and Education

## Annexure B – materials on request & program support materials

<b>Primary documents</b>	<b>Description</b>	<b>Format</b>	<b>Objective</b>	<b>Status</b>
<b>Program overview</b>	A summary of the cyber improvement program (Cyber-Star maturity model plus roadmap packages.)	<i>Brochure</i>	Hand out at conclusion of cybersecurity discussions to explain the “next steps” options and process for following the uplift program	For update
<b>Cybersecurity maturity model (Cyber-Star)</b>	Suggested cybersecurity measures appropriate to law firms depending on resource levels.	<i>Table</i>	A baseline non-compulsory standard exploring appropriate control measures. Incorporates Essential 8 and NIST framework. “Cyber star” model similar to food safety standard star rating.	For review and update with alignment to SMB-1001 (if not discontinued & replaced)
<b>Cybersecurity roadmap – small firm</b>	Detailed week-by-week project outline with supporting materials suggesting how to implement the cyber star program. Versions available for Micro, Small & Mid sized firms.	<i>Booklet (54 page)</i>	To encourage sustained effort to implement appropriate cybersecurity.  To remove blocks to action suggesting how each stage can be implemented as efficiently and cost effectively as possible.	For review and update with alignment so SMB-1001
<b>Cybersecurity roadmap – mid firm</b>	As above, with implementation more focussed on policy and education, security culture in addition to technical measures	<i>Booklet</i>	As above.	For review and update with alignment so SMB-1001
<b>Law Firm Information Security – where to start</b>	A summary outlining standard cyber session content – risks – escalation of damage – likely attack vectors.		(1) Reinforcement of session content. (2) A discussion starter for interested parties wishing to encourage further focus on the issue within their firm. (3) call to action.	
<b>Supporting resources</b>	<b>Item</b>	<b>Format</b>	<b>Objective</b>	<b>Status</b>
